L4: Enforced Modularity

Robert Morris

6.033 Spring 2009

```java
public interface BidInterface extends Remote {
  public String bid(String) throws RemoteException;
}
```

```java
public static void main (String[] argv) {
    try {
      BidInterface srvr = (BidInterface)
          Naming.lookup("//xxx.ebay.com/Bid");
      winning = srvr.bid("123");
      System.out.println(winning);
    } catch (Exception e) {
      System.out.println ("BidClient exception: " + e);
    }
  }
```
