Self Destruct

# Examples

Self Destruct

# Audio

- ❖ Two tones
  - high tone controls left double click
  - Low controls right click
  
- ❖ FFT - frequency bands

# Teensy

```
Mouse.click();
```

```
Mouse.set_buttons(1, 0, 0); // hold left button  
Mouse.move(-30, 10);       // move the mouse while holding  
delay(500);  
Mouse.set_buttons(0, 0, 0); // release button after move
```

# Milestones

## Week 1:

- ❖ Gather/Order all required components
- ❖ Finish Block Diagram for high level overview
- ❖ Finish project proposal and prepare for the project presentation

## Week 2:

- ❖ UART connection between Teensy and FPGA
- ❖ Teensy feeding mouse movement to laptop
- ❖ FPGA can recognize high and low tones

## Week 3:

- ❖ Integrate camera to recognize different LED colors
- ❖ High and Low tones correlate to FPGA actions

## Week 4:

- ❖ Translate gloves positions into XY coordinates
- ❖ FFT programmable mode
- ❖ Fool-proof audio and visual systems

## Week 5:

- ❖ Integrate audio and visual components

## Week 6

- ❖ Demo project on Bloons Tower Defense
