Plastic Film Recycling

Bubble wrap
Grocery Bags
Produce Bags
Bread Bags
Clean Plastic Wrap
Food Storage Bags
Plastic Air Pillows
Beverage Case Wrapping
Retail Bags
Paper Product Packaging
Dry Cleaner Bags

Confused about what to do?
The number on an item tells what it's made from, not where to recycle it. Recycle plastics #1, 2 and 5. All items should be empty and clean. Food waste causes contamination, so make sure it goes in its own bin.

No food waste please! Make sure your items are clean and dry. Plastic film bins are located in many mail rooms and residence halls.

Food Waste

Food Scraps
Organic Material
Napkins
Paper Towels

Collect your food scraps in a separate container and dispose of them in the food waste bins on campus.

Trash

Black Plastic
Plastic Cutlery
Milk and Juice Boxes
Waxy/Styrofoam Food Containers
Condiments
Candy Wrappers
Straws, Chip Bags

Trash = What goes in a landfill, and eventually the ocean, plants, animals and YOU. Minimize your consumption of non-recyclable products.
