Computing

All Institute attendees have accounts on the MIT Computing Environment, known as Athena. Your athena account gives you an email address (YOUR_USERNAME@mit.edu) and 250Mb of storage. You will be able to check email, browse the web, and print. Athena workstations are distributed about campus in clusters. Each Athena cluster has its own dedicated laser printers. The Athena clusters are open 24 hours a day, seven days a week. Each cluster is in a locked room, accessible by entering a combination into a keypad lock. Please e-mail isa-2005@mit.edu for the combination. Cluster locations and information on the type of equipment at each cluster is on the next page.

Those who bring laptops with wireless cards will be able to access the internet through MIT's wireless network. A one-time web-based registration is all that's required. You will need to be on campus to register. Wireless access is available on most of the campus; the Stata Center, where most of the classes will be held, has complete coverage. A map of wireless coverage on campus is available at <http://web.mit.edu/network/wireless-map.html>. Printing facilities are also available at the CopyTech centers on campus; printing will cost a small fee per page.

For participants who are taking courses that use the computer classroom, there will be 24 hour access to the computer classroom to work on class projects. These computers are for class projects only.
