

BioSym Seminar Series 2018

RIKEN National Science Institute

Genichi Tsuzawa

Director, RIKEN Singapore Representative Office

Date : 30th July 2018, Monday

Time : 12 pm to 1 pm

Venue : Level 5, Perseverance Room

Abstract

RIKEN National Science Institute was established in 1917 and remains one of the most prominent research institutes in Japan. It employs about 3000 scientists and undertakes research over a broad range of natural sciences from particle physics to genomics, medicine and neuroscience. RIKEN has grown its network of collaborators at the research institutions around the world and actively supports research collaborations and the exchange of researchers, students and staff with universities and institutions all across the globe. RIKEN's Singapore Representative Office has been responsible for these activities with partners in Singapore, South East Asia and India since its set-up in 2006. In this talk, I will present RIKEN in general and how RIKEN could possibly contribute to researchers here in Singapore.

Short Biography

Mr. Tsuzawa graduated from Tokyo University in 1977 with a BA in Law and is a Chartered Member of the Security Analysts Association of Japan (CMA). He has undertaken various assignments in capital markets and international finance, and was Managing Director for various overseas posts, such as for Industriebank von Japan Deutschland AG (IBJ Germany) and DIAM Singapore Pte. Ltd. (Singapore). He joined RIKEN in May 2014 and was assigned as Director of its Singapore Representative Office in July 2014.
