

# The Egg Drop

## Materials

1. Egg
2. Whatever you want!

## Directions

1. The goal of this project is to drop your egg from a high place (the top of a ladder, out a window, etc.) and not have the egg break.
2. Think of many different designs before building your egg holder. Think about what makes the egg break, and how you can best guard the egg.
3. Build a container for your egg that you think will keep the egg safe. Be as creative as you want!
4. Have an adult help you bring your container with the egg to a high place.
5. Drop the egg!
6. Open your container and see what happened!

## Questions

1. What about your design made the egg break? Not break?
2. How would you design your container differently next time?
